NB. 2+2 Drawers allows all four draws to be useable when bedside tables are in use.

Terminology

Miracoil™ spring system

- Each Miracoil™ mattress gives you and your partner the support you need despite differences in size and weight.
- Every Miracoil™ mattress contains twice as many springs as an ordinary mattress
- Every Miracoil™ mattress has springs concentrated in the centre third of the bed to give support where it's needed most
- The unique figure of eight Miracoil™ springs give extra surface coverage and therefore more support
- Each row of Miracoil™ springs is made from a continuous coil of wire to distribute weight more effectively.
- The Miracoil™ system gives progressive support. More weight applied, the more the springs respond.
- No roll together, roll off

Miragel™

- Revolutionary 3D gel technology for instant comfort
- Features the latest innovation for a unique feel.
- Supports and cushions your body in the way that cant be imitated
- Distributes your body weight evenly to relieve pressure and protect your back
- No roll together , no roll off

Miratex™

- Miratex™ foam for comfort and support
- Hypo- allergenic and dust mite resistant
- No roll together , no roll off
- Extra support where your body needs it most
- Removable washable cover

Mirapocket™

- Unique two layer spring combination
- 750 Miracoil™ springs unrivalled where you need it most
- 1350 hand crafted individually pocketed springs for luxurious comfort
- No roll together no roll off
- Extra support where your body needs it most

Memory foam

- Made from chemically treated polyurethane.
- Referred to as viscoelastic
- The foam is firm at cooler temperatures and softer in warmer environments.
- The foam reacts from the heat of the body which allows the material to mould to the shape of your body providing firm support.
- Returns to original shape when no pressure applied

Latex mattresses

- Quality luxurious product, superior comfort and support
- Latex is a natural product produced from the sap of trees, has hypo-allergenic properties, and helps prevent bed bugs.

Quilted mattresses

- Quilting Stitched to the mattress cover and to the top layer of the mattress core.
- Quilted mattresses are smoother and softer and create a flatter sleeping surface
- High loft and deep quilt give extra comfort

Tufted Mattresses

- Usually a nylon tape is passed through the mattress and secured both sides with either pompoms or buttons
- Creates a firmer mattress

Damask Cover

- Damask is a woven patterned fabric usually made from cotton or synthetic fibres.
- Used to cover mattresses and divan sets
- Can vary in quality and softness.

Knitted Stretch Fabric

- Provides a soft and flexible mattress cover.

Bouclé

- Divan base cover fabric, from a three ply yarn that produces a rough textured cloth.

Platform Top

- A divan base that is constructed usually using a hardboard top.
- Provides a firmer sleeping surface.

Sprung Base

- A divan base with a full set of springs mounted onto the divan frame.
- Provides a softer sleeping surface.
- Increases mattress durability, as less strain concentrated onto mattress.

Fill power

- Fill power is a measure of the loft or "fluffiness" of a pillow
- The higher the fill power the more insulating air pockets the down has and the better insulating ability.
- Fill power ranges from about 300 in³/ounce for feathers to upwards of 900 to even 1000 in³/ounce for high quality down.

Percalé

- Percalé refers to a closely woven plain weave fabric often used for bed linens
- A thread count of 200 or higher is considered percalé.
